# Uninvolved Gazan Civilians Is Science Fiction

written by Moshe Fuzaylov | 09.06.2024

Moshe Fuzaylov: I can tell you – the planning for the rescue of the hostages began immediately after October 7th. The Shin Bet formulated two teams the day after the massacre – one to settle accounts with everyone who was involved in crossing the border fence and the second one to gather the intelligence for eventual rescue operations.

Uninvolved civilians in Gaza is a type of science fiction. In Gaza, everyone is involved – some on an emotional level and some on a practical level. Anyone who can stab you with a knife will stab you there – and the rescue forces take that into account.
