

The Be'eri Investigation: Failures and Accountability

written by Prof. Kobi Michael | 27.04.2026

Prof. Kobi Michael discusses the IDF's investigation into the October 7th events at Kibbutz Be'eri, highlighting the severe failure where a handful of defenders faced dozens of terrorists while the military arrived only hours after the massacre.

He criticizes the initial military report as being inaccurate and emphasizes the necessity of a broader, state-level inquiry to provide a complete picture of the catastrophe beyond just the military's perspective.

The full interview took place on Channel I24 on April 27, 2026.
