The Release of Shifa’s Director: A Tactical Error

written by Prof. Kobi Michael | 01.07.2024

Prof. Kobi Michael: Prof. Kobi Michael: I think that those who are very frustrated [From the release of the hospital’s director] are very right. It was a mistake, first of all because Shifa hospital became to be a symbol, and it was introduced as the ultimate symbol, or if you want the ultimate manifestation of the brutal use of Hamas of civilian facilities, mainly hospitals. We sieged the hospitals in the first phase of the war [for] several days, and in the second phase three weeks, and in the third phase we entered and surprised Hamas there in the compound. Everybody understands that the main principal [director] of this hospital was fully aware to the idea that Hamas compound was built just beneath the hospital.

The interview took place on the ILTV channel on July 1, 2024.
